Subject: Delinquency Notice Phone call - Rock-It Stone Works (S/013/003)

I received a call from Kimberly Jiron today regarding a delinquency notice she became aware of recently while visiting the offices of the new owners of Rock-It Stone Works. She was not sure which property this referred to or where it was. She stated they had sold the business some time ago to another party. She said they had always paid their bills on time. She wasn't sure why the new owners had not responded to our notices. She did not know if the new owners had any interest in this property or had taken any material off the site.

I advised her of what our dbase records said regarding this site which was apparently a mineral materials sale upon USFS land. The notice was originally filed with USFS and accepted by us back in July of 1996.

I told her that we had permit transfer was sent out, but dbase records do not state if the completed form was ever returned. She wasn't sure either. She said she would talk with her husband tonight and have him call Tony to try and work out the confusion.

I have made notes in the dbase records describing this phone call as well.

Joelle, please copy this to the mine file (S/013/003)
